

ABOUT ANGLES

Monarch Metal's architectural aluminum angles are extruded from 6063-T6 Aluminum and can be used in various architectural applications. Designed for versatility, they are commonly used to finish millwork, trim, or to add protection for surfaces. Architectural aluminum angles are easily fabricated for use in many different projects, providing strength, durability, and long-term corrosion resistance. They are perfect for cutting, drilling, and welding, making them a go-to choice for frame construction and other applications.

Our architectural aluminum angles are available in five widths and three stock lengths and can be easily cut, shaped, and fabricated to suit any project. We can also provide custom lengths up to 16 feet.

FEATURES

- Extruded from durable 6063-T6 Aluminum
- Available in Mill and Clear Anodized Finishes
- Angles available in five widths (0.75", 1", 1.25", 1.5", 2")
- Available in 0.125" stock thickness
- Angles available in three stock lengths (48", 96", 192")
- Custom lengths available, get any length you need up to 16ft.

APPLICATIONS

Our architectural metals are ideal for a variety of applications, including:

- **Millwork & Trim**
Give your space a clean and modern finish to your edges.
- **Protection & Support**
Lightweight, strong, and durable. Our 6063-T6 aluminum angles will look good and last for a very long time.
- **Exterior Applications**
Aluminum is highly resistant to corrosion, making our angles perfect for any exterior projects.
- **Artwork**
Monarch Metal's architectural angles have been used for sculptures and other amazing artwork. The applications for architectural metals are endless, the only limit is your imagination.

COMPONENT OVERVIEW

PRODUCT SPECIFICATIONS

Material: 6063-T6 Aluminum

Finish: Mill, Clear Anodized

Specification: Equal Legs, Sharp Corner

Type: Architectural

Thickness: 0.125"

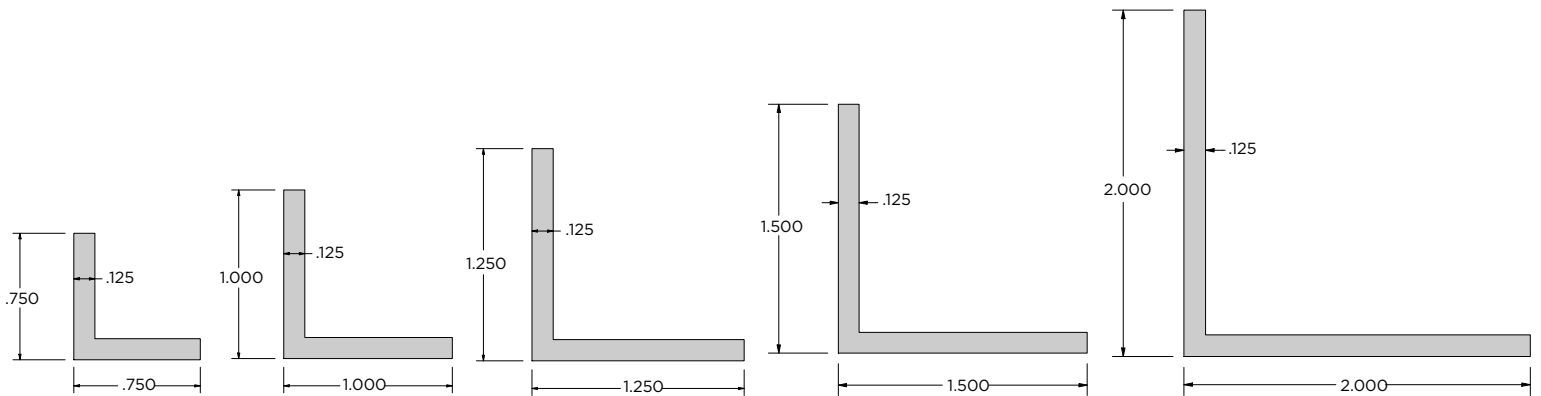

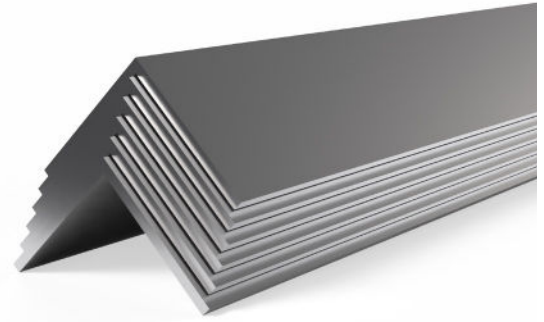

Widths: 0.75", 1", 1.25", 2"

Lengths: 48", 96", 192"

Custom Lengths: Any length up to 16'

Applications: Interior / Exterior

Availability: Same Day Shipping
